# SANBAG Agreement No. C09014 TRADE CORRIDORS IMPROVEMENT FUND PROJECT BASELINE AGREEMENT

#### 1. PARTIES AND DATE

1.1 This Project Baseline Agreement (Agreement) for the I-10 Corridor Logistic Access: I-10 Citrus Interchange Improvements, effective on September 1, 2008, is made by and between the California Transportation Commission (Commission), the California Department of Transportation (Caltrans), and the San Bernardino Associated Governments (SANBAG), the City of Fontana and County of San Bernardino (Project Sponsors), sometimes collectively referred to as the "Parties".

#### 2. RECITAL

2.1 Whereas at its April 10, 2008 Meeting the California Transportation Commission programmed the Trade Corridors Improvement Fund and included in this program of projects the I-10 Corridor Logistic Access (Citrus Interchange Improvements), the parties are entering into this Project Baseline Agreement to document the project cost, schedule, scope and benefits, as detailed on the Project Programming Request Form attached hereto as Exhibit A, the Project Report attached hereto as Exhibit B, and the Project Benefits Form attached hereto as Exhibit C, as the baseline for project monitoring by the California Transportation Commission and its Project Delivery Council. The undersigned Project Sponsor certifies that the funding sources cited are committed and expected to be available; the estimated costs represent full project funding; and the scope and description of benefits is the best estimate possible.

#### 3. GENERAL PROVISIONS

The Project Sponsor and Caltrans agree to abide by the following provisions:

- 3.1 To meet the requirements of Government Code Section 8879.23(c)(1), as added by Proposition 1B, and of Government Code Section 8879.50, as enacted through implementing legislation in 2007 (Senate Bill 88 and Assembly Bill 193).
- 3.2 To adhere to the provisions of the California Transportation Commission Resolution TCIP-P-0708-01, "Adoption of Program of Projects for the Trade Corridors Improvement Fund (TCIF)," dated April 10, 2008.
- 3.3 To adhere to the California Transportation Commission's Trade Corridors Improvement Fund Guidelines.
- 3.4 To adhere to the California Transportation Commission's Accountability Implementation Plan and Policies, and program and baseline amendment processes.
- 3.5 The Sponsoring Agency agrees to secure funds for any additional costs of the project. Any change to the funding commitments outline in this agreement requires an amendment.

Page 1 C09014-pc

- 3.6 To report to the California Transportation Commission on a quarterly basis on the progress made toward the implementation of the project, including scope, cost and schedule.
- 3.7 To report to the California Transportation Commission on the progress, on a quarterly basis, and outcomes, at the end of the environmental phase, of the environmental process with regard to air quality impacts due to emissions from diesel or other particulates and related mitigation strategies. Whereas the Bond Act mandates that the Commission shall allocate TCIF for trade infrastructure improvements in a manner that places emphasis on projects that improve trade corridor mobility while reducing emissions of diesel particulate and other pollutant emissions, the Department of Transportation, the Sponsoring Agency, and the Corridor Coalition understand and agree that the California Transportation Commission will only allocate TCIF to projects that can demonstrate compliance with applicable environmental requirements. If environmental clearance is conditioned to the implementation of mitigation measures, the sponsoring agency must commit, in writing, to the implementation of those mitigation measures.
- 3.8 To maintain and make available to the California Transportation Commission and/or its designated representative, all work related documents, including engineering and financial data, during the course of the project and retain those records for four years from the date of the final closeout of the project. Financial records will be maintained in accordance with Generally Accepted Accounting Principles.
- 3.9 The California Transportation Commission and/or its designated representative, has the right to audit the project records, including technical and financial data, of the Department of Transportation, the Sponsoring Agency, and any subconsultants at any time during the course of the project and for four years from the date of the final closeout of the project. Audits will be conducted in accordance with Generally Accepted Government Auditing Standards.

#### 4. SPECIFIC PROVISIONS AND CONDITIONS

#### 4.1 Project Schedule and Cost

See Project Programming Request Form, attached as Exhibit A.

#### 4.2 Project Scope

See Project Study Report/Project Study Report Equivalent, attached as Exhibit B.

#### 4.3 Project Scope

See Project Benefits Form, Attached as Exhibit C.

#### 4.4 Other Project Specific Provisions and Conditions

The Project is also a recipient of State Transportation Improvement Program (STIP) funds.

Trade Corridor Improvement Fund **Project Benefits Form** EXHIBIT C

Project Title:

I-10 Citrus Interchange

Project Category:

Highway Interchange Improvement

Project Type:

Modified Interchange (1)

Outputs:

Expand current interchange from 4 to 7 total lanes bridge and add one lane to each ramp.

Outcomes:

**Outcome** 

Safety

Although reduction of accident rates is a secondary objective to congestion relief for trucks at this interchanga Safety benefit is expected from Increase in capacity and creation of additional storage for turn pockets will reduce the frequency of queues backing into cross traffic on adjacent arterials or backing into the freeway mainline. In addition, based upon a traffic queuing analysis for future projected (year 2030) traffic, no traffic queues are expected to exceed the space provided along Citrus Avenue or the interchange ramps. Also, the new interchange improvements have been designed to accommodate turning paths of large interstate trucks.

Velocity

Average roadway speeds along Citrus Avenue and the interchange ramps will be enhanced by the Project. For example, an indicator for the average roadway speed, is the delay vehicles experience while traveling through the interchange (i.a. the lower the delay the better the average roadway speed). For the existing interchange in

the year 2003, vehicles travelling through the interchange experienced a delay of 260 to 300 seconds. With completion of the Project's improvements, for future projected (year 2030) traffic, the delay for vehicles travelling through the interchange is expected to be 30 to 36 seconds.

This is nearly a 10-fold reduction in traffic delay, and this would represent a significant increase in the average roadway

speed along Citrus Avenue and the interchange ramps.

Throughout

As noted below, in the Reliability section, this project will improve the Level of Service for traffic at the interchange.

Also, this Project in not expected to affect the number of trucks, or Level of Service along the freeway.

Reliability

For the existing interchange, for Year 2003 traffic, three of the four intersections along Citrus Avenue experience unacceptable traffic operating conditions for either or both the AM and PM peak hour conditions. With the Project's Improvements, for future projected (Year 2030) traffic, these three intersections will be improved to levels

Congestion Reduction

339 vh/d Daily hours of delay saved for total traffic

**Emissions Reduction** 

90 tons per year Reduction of Particulate Matter combined of ROG, PM10, NOx

164,000 tons per year reduction of Carbon Dloxide (CO2)
